## EXPERIENCE

### TEAM RESEARCHER OF "STAY ALERT: A REAL-TIME ANDROID-BASED APP FOR RESCUE SUPPORT SYSTEMS DURING DISASTERS AND EMERGENCIES"

- I created a web-based admin to change and monitor data from our application's Firebase database for "STAY ALERT: A REAL-TIME ANDROID-BASED APP FOR RESCUE SUPPORT SYSTEMS DURING DISASTERS AND EMERGENCIES."

### PHILIPPINES NATIONAL SKILL COMPETITION - TESDA 2022

Worldskills Philippines

- **Provincial - Gold Medalist**
- **Regional - Silver Medalist**
- I developed using Android Studio and VB.NET for the given test cases that must be finished within the time limit. The test cases have instructions on them, and we must try to develop the same requirements in the test cases.

### IMMERSION EXPERIENCE

**Main Developer of the MC Inventory System for Mabini  
College's Property Custodian Department**

Summer of 2022

- A mechanism for keeping track of inventories for the property manager
- PHP was the programming language I used to create this system, and the front- and back-ends are made up of HTML and CSS. This system's database makes use of XAMPP.
- The school now uses this to lessen and enhance the manual labeling of products that must be distributed to various departments.
- Time-saving features like ready-to-print PDFs from the database and simply arranged data within the system are provided by this system.
